

Baby Bib

Instructions written by Mary M. Hogan www.marymhogan.com

I designed this pattern to make bibs for hospitalized children. You may use this pattern in any way except for selling the pattern or bibs made from this pattern.

1. Make a full-size pattern using freezer paper or other paper. Extend the side lines of the pattern 8" down from the arrows for an infant bib or 11" down from the arrows for toddler bib. Add curves at the bottom corners to make turning easier. *If desired, you can extend the pattern 3-4 more inches and fold to make a front bottom pocket to catch dropped food. In this case do not use curves at the bottom.*
2. Cut 2 pieces of fabric and one piece of batting
Infant bib: 11" X 17"
Toddler bib: 11" X 20"
Note: add more length if making a pocket.
3. Place one piece of fabric right side up on top of the batting. Sew through the fabric and batting to quilt the rectangle for the bib front.
4. Place the quilted fabric right side up. Place the other fabric rectangle right side down on the quilted fabric. Pin the pattern onto this stacked rectangle and cut out. Sew $\frac{1}{4}$ " from the edge all around. Leave a 3" gap on one side to allow for turning.
5. Turn the bib right side out, smoothing all the sewn edges. Press to flatten. Pin the gap closed and sew $\frac{3}{8}$ " to $\frac{1}{2}$ " from the edge all around the bib. If you made a pocket, you can now sew the bib at the sides to complete the pocket.
6. Apply sew on or iron-on hook and loop tape (e.g., Velcro) to the tabs at the top so that the bib can be fastened around the child's neck.

Place hook and loop tape
On wrong side

Place hook and loop tape
On right side
