Learn a new approach to hexagon quilts. By folding circles to make hexagons and enclosing batting you'll create small hexagon units. When you put the hexagons together, the quilting is done! Learn how hexagons can be put together by hand or using a sewing machine.

The class will focus on making a table runner while learning the technique. Time permitting, Mary will also demonstrate how to make several other small items.

Participants should have basic machine sewing skills and be comfortable using their sewing machines. Zig zag or decorative stitches are needed to sew the hexagons together by machine.

The class uses techniques from Mary's book, but the book is not required to take the class.

Mary M. Hogan. 2017. Fast-Fold Hexies from Precuts & Stash: A Quick & Easy Technique for Hexagon Quilting

Class Supplies

Note: Cutting mats and rotary cutters are not needed.

___ Fabric

(6) 10" squares or 5/8 yard black for the center section

(6) 5" pre-cut squares or ¼ yard for the small hexies for the center section

(16) 10" squares or 1-¼ yard fabric for the outer ring

(16) 5" squares or ½ yard for small hexies for the outer ring

___ **Batting:** 5/8 yard batting of 45" wide batting or small amounts of scrap batting will be needed. I prefer Warm and Natural or Warm and White batting because of their stability. But bring what you have.

___ **Thread:** matching thread for sewing hexagons together & contrasting thread if you want

___ Long straight pins (quilting pins). Very fine pins are useful for this technique, so bring them if you have them.

___ Paper scissors and Fabric scissors

___ Hand sewing needles and anything else you like for hand sewing, such as a thimble

___ Paper and a pencil or pen for tracing templates

___ Sewing machine, usual machine sewing supplies,

This technique requires a machine with decorative stitching options
